Groups Tags Security credentials Last Accessed

#### Permissions policies (3)

Permissions are defined by policies attached to the user directly or through groups.

Filter by Type All types

| Policy name                                    | Type             | Attached via |
|------------------------------------------------|------------------|--------------|
| <input type="checkbox"/> AmazonS3FullAccess    | AWS managed      | Directly     |
| <input type="checkbox"/> CustomIAMListRoles    | Customer managed | Directly     |
| <input type="checkbox"/> IAMUserChangePassword | AWS managed      | Directly     |

► Permissions boundary (not set)

▼ Generate policy based on CloudTrail events

You can generate a new policy based on the access activity for this user, then customize, create, and attach it to this role. AWS uses your CloudTrail events to identify the services and actions used and generate a policy. [Learn more](#)

# CLOUDTRAIL

## Syed: clinic-trail

The screenshot displays the AWS CloudTrail console for the 'clinic-trail'. The left sidebar shows the navigation menu with options like Dashboard, Event history, Insights, Lake, Dashboards, Query, Event data stores, Integrations, Trails, Settings, Pricing, and Documentation. The main content area is titled 'clinic-trail' and includes buttons for 'Delete', 'Stop logging', and 'Edit'. Below the title, there are four sections: 'General details', 'CloudWatch Logs', 'Tags', and 'Aggregated events - New'. The 'General details' section contains a table with the following information:

| Trail logging                  | Trail log location                                 | Log file validation                     | SNS notification delivery |
|--------------------------------|----------------------------------------------------|-----------------------------------------|---------------------------|
| Logging                        | clinic-logs-syed-042608219752/AWSLogs/042608219752 | Enabled                                 | Disabled                  |
| Trail name                     | clinic-trail                                       | Last file validation delivered          | Last SNS notification     |
| Multi-region trail             | December 11, 2025, 07:22:07 (UTC-05:00)            | December 11, 2025, 07:26:02 (UTC-05:00) | -                         |
| Apply trail to my organization | Log file SSE-KMS encryption                        |                                         |                           |
| Not enabled                    | Not enabled                                        |                                         |                           |

The 'CloudWatch Logs' section shows 'No CloudWatch Logs log groups' and 'CloudWatch Logs is not configured for this trail'. The 'Tags' section shows 'No tags' and 'No tags associated with this trail'. The 'Aggregated events - New' section is currently empty.

## Safwan: clinic-trail-safwan

The screenshot displays the AWS CloudTrail console for the 'clinic-trail-safwan'. The left sidebar shows the navigation menu with options like Dashboard, Event history, Insights, Lake, Dashboards, Query, Event data stores, Integrations, Trails, Settings, Pricing, Documentation, Forums, and FAQs. The main content area is titled 'clinic-trail-safwan' and includes buttons for 'Delete', 'Stop logging', and 'Edit'. Below the title, there are four sections: 'General details', 'CloudWatch Logs', 'Tags', and 'Aggregated events - New'. The 'General details' section contains a table with the following information:

| Trail logging                  | Trail log location                                   | Log file validation                     | SNS notification delivery |
